Thesis Film
Siewli and AhFAI

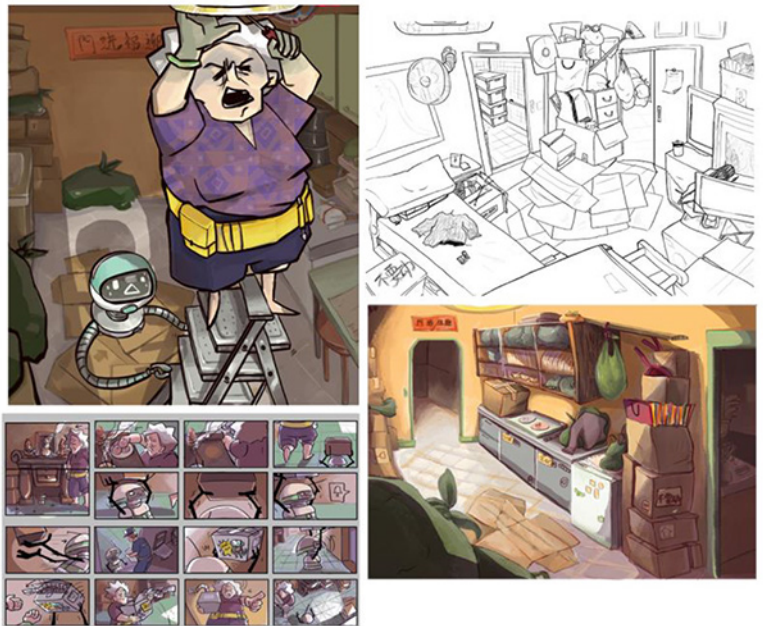

Paint Artist (Stereo Conversion)

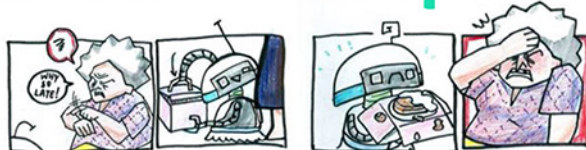

Final Year Project at LASALLE College of the Arts

Siew li and AhFAI is a 5min 2D animated short which illustrates the colourful life old mechanic Siewli shares with overly eager, cleaning robot Ah FAI. It was a collaborative effort with team mate Low Hui Li, who came up with the initial concept of a robot learning to get along with an old lady. Both of us developed the final narrative and animated the film. My role in this project was also to create character designs, layouts and a few environment designs.

24 hour Comic Challenge

24 page comic lined and coloured in 24 hours, over one weekend. I used this opportunity to explore other character narratives for Siewli and AhFAI.
